Commissioners
Arizona Corporation Commission

Dear members of the Arizona Corporation Commission,

Docket Number: E-01345A-16-0036 + E-01345A-16-0123

I am writing to urge you to say no to the proposed APS rate hike.

As an APS customer, I object to this method of charging people for their electricity.

APS has been encouraging people to conserve so if folks manage to reduce their bills APS wants to change the way they charge for what people are using. It seems that APS needs to change their business name.

I find the number and amounts of other fees APS charges, more than sufficient to cover their needs. A bill for actual Generation of electricity comes to \$86.14 and the fees add another \$100.00 to that and that is just for one month. There is a Delivery service charge on that bill of \$41.20. This request is just another method of gouging the customers who have no other option to obtain electrical service.

Enough is Enough, in reality the current cost is closer to \$.13+ per kwh now that is purchased kwh = 1526 bill is 203.18 $203.18 / 1526 = 0.13314$ that is really enough for people on a pension to pay for basic electricity. and we do have a solar system to help offset our electrical use.
